

Michael J. Bowker

Vice President, Business Development

Mr. Bowker provides strategic business development, negotiations strategy, program management experience and executive level support to determination of company short-and long-term objectives. He brings more than 25 years of technical operations and top management experience in the aerospace industry with the majority in support of major NASA programs including the Space Shuttle and the International Space Station (ISS).

As Chief Operating Officer (COO) of SPACEHAB, he led a highly successful customer-oriented team in support of NASA programs. Mr. Bowker has held senior and executive management positions with United Space Alliance, LLC. and Rockwell International Inc. In addition he served as a project manager at NASA, Kennedy Space Center, where he held functional responsibility for the Center's Assured Crew Return Vehicle (ACRV) requirements and configuration management system. His earlier career was as a systems engineer with the Lockheed Space Operations.
